May 2024

ABOUT OUR CAMPUS

At The GreenFields, we understand that home means something different for everyone. Some of the many benefits of our Continuing Care Community is that our campus is inclusive and welcoming. We can meet the individual's changing needs throughout the aging process all in one place.

Our Admissions and Senior Living Team includes a variety of professionals who help individuals both in the community and within the campus navigate alternate living options, including:

Manor – Independent Living is perfect for those seeking to enjoy retirement with greater freedom and convenience.

Court – Assisted Living provides a little extra help for some of life's daily activities such as medication management, showering, meals.

Terrace –

- Enhanced Assisted Living gives more assistance for those who are in between assisted living and skilled nursing.
- Memory Care at the Terrace assists individuals with memory conditions that require the support of specially trained staff to help with meals, medication management and other daily activities.

Health & Rehabilitation Center –

- Subacute Rehabilitation is a short-term, inpatient stay providing specialized treatment programs designed to help individuals recover from a variety of conditions.
- Skilled Nursing includes an interdisciplinary team of care staff available 24 hours a day to meet the unique needs of each individual.
- Respite Care provides community caregivers with the ability to take a much-needed rest or vacation by offering short term care to their loved one.

Our team is dedicated to assessing the needs of and providing guidance to both our current and prospective residents and their loved ones. Our goal is to ensure someone is welcomed to the most appropriate environment related to their physical, social, and spiritual needs. We work closely with community partners and providers to support a smooth transition to our senior living options.

Health Tips

As warm weather approaches, residents and family should remember to apply sunscreen when going outdoors. Sunscreen protects us from the UV rays which cause sunburn. As we all know, sunburn can be very painful and, in some cases, can lead to several types of skin cancers.

When applying sunscreen, be sure to apply to the most sensitive areas of the face (don't forget the ear lobes!). It may feel cool outside but when the sun is out, sunscreen is most important.

As we all venture outside for walks, rides or visits with family remember to apply your sunscreen.
