ABOUT OUR CAMPUS

A Walk to Remember: Therapy That Moves You Forward

Every walk tells a story. Some steps are light and easy, while others carry the weight of challenge, recovery, and determination. At GreenField Health & Rehabilitation Center, we believe that every step matters—and that each one can lead to a new chapter filled with strength, confidence, and independence.

For many patients, the first steps in therapy are the hardest. Standing after surgery, finding balance again after a fall, or learning to move without pain can feel overwhelming. But in these moments, no one walks alone. Our therapists are by your side—offering encouragement, expertise, and compassion to help turn uncertainty into steady progress.

A “walk to remember” might look different for everyone. For one person, it’s the joy of walking down the aisle at a family wedding. For another, it’s returning to gardening, shopping, or playing with grandchildren. These milestones are not just medical accomplishments; they are life moments regained—moments that bring meaning back to daily living.

Our team uses every resource available—from hands-on therapy to state-of-the-art equipment and even the soothing support of our therapy pool—to help you move forward with confidence. But what truly defines our care is not just the tools we use, it’s the relationships we build. We listen, we encourage, and we celebrate every victory with you, no matter how small.

Because healing isn’t just about where you’ve been—it’s about where you’re going. And every step along the way is a step worth remembering.

If you or a loved one are looking to take the next step in recovery, we invite you to connect with us. Call (716)206-2414, or stop by to tour our therapy spaces and meet our caring team. Your walk to remember can begin today.

Health Tips

Flu vaccines are available in all your local pharmacies and will be offered in all facilities on the GreenField Campus. The Manor, Court and Terrace will offer vaccines through Wegmans Pharmacy on September 11 from 9a-4:30p. Specific times are posted in each facility. At the nursing home vaccine dates will be scheduled with the unit nurse in the near future.. Your risk for influenza increases as you age, are pregnant, or if you have one or more of these conditions:

- Chronic illnesses, such as but not limited to, chronic lung disease (asthma and COPD), heart disease, diabetes, kidney disease, liver disease, or metabolic disorders
- A weakened immune system
- Body mass index (BMI) of 40 kg/m2 or higher

Consider getting your vaccine this fall and stay healthy
